Stock Levels Report

Generated: 8 January 2026 at 03:49 pm

AI-POWERED ANALYSIS

Intelligent Inventory Management System

This report contains AI-generated insights and recommendations

Executive Summary

The current stock levels indicate a moderate surplus of units across the unassigned SKUs, with 992 units available. This could be an opportunity to optimize stock levels and reduce storage costs. Further analysis is required to determine the optimal stock levels.

Key Metrics

Total Products

12

Total Depots

2

Total Value

Rs 1,35,75,000

Low Stock Items

0

Performance Score

75/100

Good

Key Insights

1. Unassigned SKUs account for 12 unique products
2. Total units in unassigned SKUs amount to 992
3. No assigned SKUs are reported across the 2 depots
4. Stock levels may require rebalancing to meet demand

Recommendations

1. Conduct a thorough review of unassigned SKUs to identify potential candidates for assignment or disposal
2. Analyze historical sales data to determine optimal stock levels for each unassigned SKU
3. Consider implementing a just-in-time inventory system to minimize storage costs
4. Develop a plan to redistribute or clear excess stock

Alerts

Excessive stock levels may lead to waste and unnecessary storage costs if not addressed
